## *"Fusible GlitterFlex Ultra"* Embroidery Instructions

Care/Application Instructions: Wash inside out, wash cool, tumble dry. Not recommended for use on nylon, dazzle cloth, shiny polyester, or moisture-wicking materials. Holo Pink and Holo Orange are translucent and will take on the color of the garment.

1. Sew the Applique Placement line (Figure 1).

Figure 1

2. Cut the Fusible GlitterFlex Ultra a bit larger than the placement line (Figure 2). Peel back the clear plastic sheet and toss (Figure 3).

Figure 2

Figure 3

3. Lightly spray the back of the Fusible GlitterFlex Ultra with spray adhesive. Place Fusible GlitterFlex Ultra over the Applique Placement line. Stitch out the Applique Material step so that the Fusible GlitterFlex Ultra will be tacked down into place (Figure 4).

Figure 4—Fusible GlitterFlex Ultra tacked down.

4. Take the hoop out of the machine but **not** the fabric out of the hoop. Tear away excess Fusible GlitterFlex Ultra and trim if needed to clean up outer edges of tack down stitch (Figure 5).
5. Place hoop on ironing surface. Using a pressing sheet, press Fusible GlitterFlex Ultra with small iron at highest setting for 15-20 seconds. This will fuse the material in place and omit the possibility of any bubbles or slippage (Figure 6).

Figure 6—Pressing Fusible GlitterFlex Ultra while in hoop.

6. Place hoop back into the embroidery machine and complete the stitching of your design (Figure 7). **Note:** Always press embroidery from the backside. A pressing sheet is recommended.
